This is an unusual complaint for me, as I often complain of too little. What a wonderful, morbidly beautiful work of memoiristic philosophy sprinkled thoroughly with history, earth sciences, etymology, poetics and literary leanings, psychology, and the nature of humanity at its most base levels.

This book is more than simply about species loss, however, as the word 'extinction' suggests. This book is about us more than anything – what we do to our environment as a species, why we do it and what the effects are. There is something haunting about this book. See all 6. A formidable inquiry into why the marvels of nature and the distinctiveness of cultures are constantly imperiled. As Challenger interacts with a variety of landscapes and travels to some remote locales. If you've ever been frustrated by news about the breakneck pace at which wildlife habitats are being destroyed, you will want to read poet Melanie Challenger's *On Extinction*, a meditation on humanity's appetite for destruction.
