At the very beginning of this book, Weyl engaged in a discussion of the pertinent antinomies, the most famous of which is the one by Russell about the set of all sets that does not contain itself as a member. These questions will be only partially dealt with in the present study.

If there was dialogue, commonly shared problems, and discussion Horstmann's. Nevertheless, it is quite conceivable that he was satisfied with the mere statement that knowledge begins with experience. The consistency of his presentation his proofs of each thesis, antithesis and secondary related arguments has been subjected to endless scrutiny and criticism from a formal logical standpoint, and Kant is more criticized than praised for the layout of his arguments.

This process of successive negation is not seen as self-defeating; rather, it

as something fixated, it is both distinguishable from the original check that led to the oscillation of the imagination and presupposes this activity thus conserving the original reaction to the check.
