Boonsta, A. Institutions should inform patients about the specifics of data sharing. As physicians and other clinicians move through MU, past the stage of commercial technology acquisition and implementation, the need for a deeper understanding of the structure AND function of these new knowledge systems is not only necessary but essential. Producinghealth,consuminghealthcare. The use of an EHR should align the work with the training of the worker. Fictitious patient data can be used to generate a wide variety and complexity of cases that can be used to illustrate the features and functions of EHRs as well as their limitations in supporting health professional work. Sufficient resources should be available for the new work associated with the advanced use of an EHR.
