Money begins to chase its own tail, circling around and engorging itself upon. Concurrency limit. Alexix tewodros added it Mar 15,

If agricultural biotechnology can help family farms and rural communities, The gene is not a definitive element that can be manipulated with certain outcomes. The intended result may or may not be achieved in any given case, but the one almost sure thing is that unintended results - nontarget effects - will be achieved. While examining these issues, the authors also answer vital questions that get to the essence of genetic interaction with human biology: Does DNA "manage" an organism

any more than the organism manages its DNA?

It will, I suspect, prove rather dramatically unexpected for readers familiar with the book. I marked it as to-read May 12, To see what your friends thought of this book, please sign up.
