Plan 1. Organisation du travail (French Edition) on the experience of the first two "Villigen workshops", the third in the series extensively analysed three case studies, which covered the licensing of a new facility, the clean-up and release of an old facility, and the rehabilitation of a large, contaminated area. These exercises used as a basis a national-level emergency exercise at an existing power plant, and aimed to achieve three international objectives: the

real-time exchange of information, public information and decision making based on limited information and uncertain plant conditions.
